

What is it?

From a gritty boost to a beautiful, singing overdrive, the Diamondback is a tube amp's best friend. Designed specifically to go in front of a warm tube circuit, the Diamondback works with the tubes in your amp to produce shimmering grit and sustain. It's almost like having another channel on your amp that you never noticed was there before. The Diamondback also has more top end and bite to complement warmer amps and humbucking guitars. Because of this, it works perfectly in front of an already crunchy amp to add a tight, gain boost for rhythm or solos.

With its 3 band EQ, you can dial the Diamondback in to blend seamlessly with your existing tone. Also, the Diamondback's "Venom" and "Attack" volume and gain controls not only work to overdrive your tone by boosting the signal, they can be turned back to under-drive an already gained out amp to give you a controllable, rolled back clean tone. So, even a great, one channel, high gain amp can be turned into a 2 channel, tone monster.

All Reptile Series pedals are hand built in house by me just like the rest of the Tortuga line. I decided to apply the "one man shop" build approach to a lesser expensive yet versatile line of pedals instead of farming them out like so many other builders do.

How does it work?

Check to see if your Diamondback came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the **9v negative tip, 2.1mm DC power jack**.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Low = Bass

Mid = Middle

High = Treble

Venom = Volume

Attack = Gain

Enter = You plug your guitar into here

Feed = **9v negative tip, 2.1mm DC power jack**

Exit = Well, just guess...

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
