MAI TAI

TM

What is it?

The Mai Tai™ is a beautiful take on a classic “script” era phaser. It has a warm and sloshy midrange sweep that encompasses everything we want in a great phaser and even travels a bit into “vibe” territory. As with any Tortuga effect, the Mai Tai™ does not take anything away from your tone; it only enhances it, makes it bigger and simply more lush. It also has a dual set of depth (Mix) and rate (Rum) controls that can be set separately and switched between so it’s like having two Mai Tais in one. I mean, we all know once you start, you can’t have just one Mai Tai™.

How does it work?

Check to see if your Mai Tai™ came with a 9 Volt battery. If for some reason it didn’t, make sure to use an alkaline battery or just use the negative tip DC power jack.

Important: Only use a 9 Volt, negative tip DC adaptor like the Boss PSA 120.

At first glance the controls may not seem to make much sense. Here’s a breakdown of what they do...

Tiki Time = Turns the effect on

Mix = Depth

Rum = Rate

1 Or 2 = Switches between the two sets of controls (“Mix” and “Rum”)

In = Duh

Out = Double duh

Juice = 9v power jack

“Mix” and “Rum” are pretty self explanatory after you start tweaking them. The “1” and “2” sets of controls are identical, but they allow you to set up two completely different phaser sounds at the push of a button. Try setting the “Mix” at 3 o’clock and the “Rum” at 12 o’clock on the “1” side for a nice rotating speaker effect. Then turn the “Mix” and “Rum” on the “2” side all the way up to, well, intoxicate people with your tone. Push the “1 Or 2” switch to switch between them. Cool, huh?

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it (“problems” do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I’ll get it taken care of.

Enjoy your cool new noisemaker!
