EFFECTS

Manhattan™

What is it?

The Manhattan™ takes the idea of a classic analog flanger to another level. Based on the tried and true foundation of the Martini™ Chorus, the Manhattan™ redefines what a flanger should sound like. The Manhattan™ is not trying to copy or clone any existing flanger on the market although it can achieve all the classic tones we love along with much more. With the "Mix" depth and "Bourbon" feedback controls, the Manhattan™ can go from a glassy, beautiful analog chorus to an airplane like flanger all the way to a crazy, freakout modulator like no other. With this and the signature Tortuga dual foot-switchable rate controls, the Manhattan's versatility is unmatched. Pull up a stool and get a taste of a classic Manhattan™.

How does it work?

Check to see if your Manhattan™ came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the DC power jack.

Important: Only use a 9 Volt, 200mA, negative tip DC adaptor like the Boss PSA 120.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Order = Turns the effect on

Mix = Master depth control for both channels

Single = Rate control for channel 1

Double = Rate control for channel 2

Bourbon = Master feedback control for both channels

How Strong? = Switches between the two channels

In = Plug your guitar into this

Out = Output to your amp

Juice = 9 Volt power supply jack

The "Mix" depth and "Bourbon" feedback controls work together to create anything from a chorus to a flanger tone. For a classic flanger, turn the "Bourbon" control all the way up and set the Mix at about 2 o'clock. Then set one of the "Single" or "Double" rate controls at about 9 o'clock. For a chorus tone, turn the "Mix" control all the way up and set the "Bourbon" control at 10 o'clock. Then set your "Single" rate control at noon and your "Double" rate control at 2 o'clock. This will give you a washy chorus on channel one and a vibrato like warble on channel 2.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
