

What is it?

The Martini™ is a lush, analog chorus who's tone is truly intoxicating. With two different speed controls that can be switched on the fly, The Martini™ acts as two completely different pedals in one. The second channel also has a switch for "Shaken" or "Stirred" to select either chorus or vibrato to add even more tonal combinations to the mix. The Martini™ also features a real bucket-brigade analog delay chip at its core which gives it that true, old-school chorus warmth and swirl.

So, belly up to the bar, skip the brew and instead, have yourself a classic Martini™.

How does it work?

Check to see if your Martini™ came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the DC power jack.

Important: Only use a 9 Volt, 200mA, negative tip DC adaptor like the Boss PSA 120.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Order = Turns the effect on

Mix = Master depth control for both channels

Single = Rate control for channel one

Double = Rate control for channel two

Shaken = Sets channel two to Vibrato

Stirred = Sets channel two to Chorus

How Strong? = Switches between the two channels

In = Plug your guitar into this

Out = Output to your amp

Juice = 9 Volt power supply jack

The "Mix" depth control works for both channels and is very sensitive to how fast the rate ("Single" or "Double") is. You can make your Martini™ sound very sickly if you have both your depth and rate up quite a ways so make sure you don't go overboard. For a nice balanced vibrato tone on channel 2, try setting your switch to "Shaken", set your "Mix" to about 12 o'clock and your "Double" rate control somewhere between

12 o'clock and 3 o'clock.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
