SINGLE MALT™

What is it?

The Single Malt™ provides both quality and quantity in one beautiful package. With Dual, foot-switchable rate controls, the Single Malt™ can act like both a small room echo and a long solo delay at the push of a foot switch. It can also be run at 9v with the internal battery or external power supply for more of an analog warmth or up to 18v with external power for more headroom and clarity. Sometimes all you need is a great Single Malt™ to make you feel like a million bucks.

How does it work?

Check to see if your Single Malt™ came with a 9 volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the negative tip, DC power jack. The Single Malt™ will effectively run at 9v, 12v or 18v with external power. More power will give it more headroom.

Note: Do not exceed 18v or use anything other than a negative tip DC jack.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Pour = Turns the effect on

Quality = Delay level

Quantity = Number of repeats

12 Years = Delay time from 0 ms to 300 ms

18 Years = Delay time from 100 ms to 600 ms

12 or 18 = Switches between '12 Years' and '18 Years' delay times

In = Plug your guitar into this

Out = Output to your amp

Juce = Negative tip power supply jack

You pretty much can't go wrong wherever you set the controls on your Single Malt™. Try setting '12 Years' at 12 o'clock, 'Quality' at 3 o'clock, 'Quantity' at 1 o'clock and '18 Years' at 3 o'clock for a nice slap-back echo and a long solo delay that you can switch on the fly.

If you really push it, the Single Malt™ will go into a self-oscillating feedback like a classic analog delay but you have to push it pretty hard to make it happen. It was designed to be a usable delay at just about any setting, not a noise machine.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
