

What is it?

The YETI™ is a massive, tight sounding fuzz that's almost a distortion, so we decided to call it a "fuzz-stortion". Anything from that sloppy 70's fuzz to a modern high gain "wall of tone" can be achieved with the YETI™. Find him, listen to him howl and don't be afraid to make him angry!

How does it work?

Check to see if your YETI™ came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the negative tip DC power jack.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Find Him = Turns the effect on

Howl = Volume

Scream = Tone (see **Note** below...)

Growl = Fuzz

Anger = Four position rotary tone switch

Position 1 = Classic scooped mids

Position 2 = Flat mids

Position 3 = Mid hump

Position 4 = Tone bypass (slight volume boost)

Enter = You plug your guitar into here

Feed = 9V power jack

Exit = Well, just guess...

"Howl" and "Growl" are pretty self explanatory after you start tweaking them. By turning the "Scream" tone control clockwise you make the treble more present and by turning it counterclockwise you bring out more bass. The "Anger" four way rotary switch gives you some distinctly different voicings and yes, the fourth position will be louder than the rest. If you're really good, you can switch it with your foot during a song for a solo boost!

Note: When using the fourth position on the "Anger" switch, the tone circuit is bypassed thus bypassing your "Scream" knob. You can turn it until you're blue in the face while in the fourth position and it won't do anything.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
