CUSTOM SHOP™
COEUR D'ALENE IDAHO USA

CRAZY EIGHT™

What is it?

Based on my Hazy Fuzz Experience - the first pedal I brought to market back in 2008 - and my discontinued dual footswitch Crazy Eight, this new version encompasses everything I've learned about octavia fuzz in one awesome pedal. The Tortuga Custom Shop Crazy Eight™ is an out-of-control fuzz and octavia that will put a "haze" over your tone like no other. With a toggle switch for an octave-up octavia tone, the sonic combinations for fuzz insanity are almost limitless. The Tortuga Custom Shop Crazy Eight™ also works beautifully as a solo enhancer and booster to help you cut through the mix and really take people's heads off.

How does it work?

Check to see if your Crazy Eight™ came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the DC power jack.

Important: Only use a 9 Volt, negative tip DC adaptor like the Boss PSA 120.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Left Knob = Fuzz control

Right Knob = Intensity control

Insanity/Fuzz Toggle = Switches between octavia fuzz and fuzz

Enter = Plug your guitar into this

Medicate = Negative tip 9v power input

Exit = Out to your amp

The controls of the Crazy Eight are pretty self explanatory when you start adjusting them. For a thick fuzz tone, Try turning the Fuzz knob up 3/4 of the way and the Intensity knob about half way up. For a cutting solo boost, switch on the Insanity and take it for a ride.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
